

Content Management Systeme

Create your content using familiar programs like PowerPoint, etc., and save the images, videos, and animations on the ScreenManager-light USB stick.

When the USB stick is connected to the display, the content will be automatically transferred to the device.

In the ScreenManager app, you can make extensive settings for playing your playlist.

The ScreenManager stick is encoded to protect your device against data manipulation.

With the Digital Signage Software solutions, you can enjoy the benefits of maximum usability and simplicity. Screen Manager Pro provides an intuitive and innovative software solution, making it easy for you to manage your digital boards, screens, and advertising materials. Transform your screens into dynamic digital advertising spaces and effectively communicate with your customers through captivating digital messages. By leveraging digital signage, you can enhance brand visibility, increase sales, and create a memorable customer experience. The system's flexibility allows you to play content on all screens and displays, whether individually or synchronized, ensuring a seamless and impactful presentation of your messages.
