

# D-Slim

This sleek Digital Signage kiosk with its 350 nit bright professional Full HD LCD display makes your content an eye-catcher.

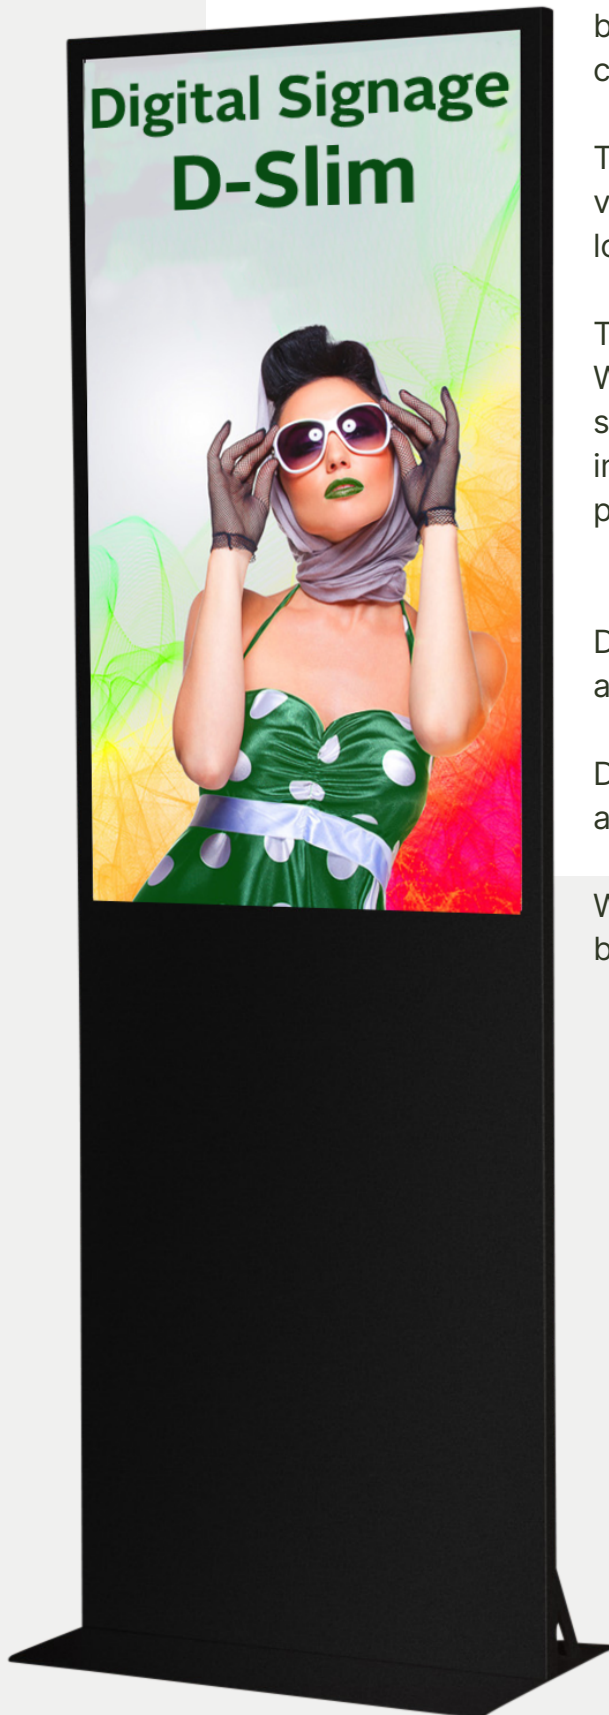

The integrated Android Digital Signage Player plays videos, animations, images, and audio in an endless loop.

The content can be transmitted to the player via WLAN, LAN, optionally with 4G, or through a USB stick and stored there. Therefore, even in case of an internet outage, the content will continue to be played from the chip

D-Slim is available with or without a touch display and comes in various screen sizes.

D-Slim is made from galvanized steel sheet and is available in standard colors of black or white.

We can customize the display by adding a logo below the screen if desired

# TECHNICAL SPECIFICATIONS

| <b>D-Slim - Das schlanke, elegante Display</b> |   |
|--|---|
| Standard Farben                                | Schwarz/Weiß  |
