

# Material Management

Optimize your inventory and enhance your company's efficiency with our advanced materials management program. Have your employees document material consumption during their services, providing real-time updates on current inventory levels.

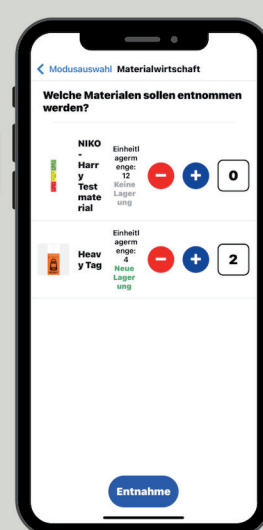

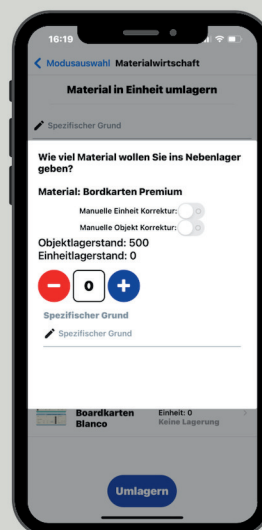

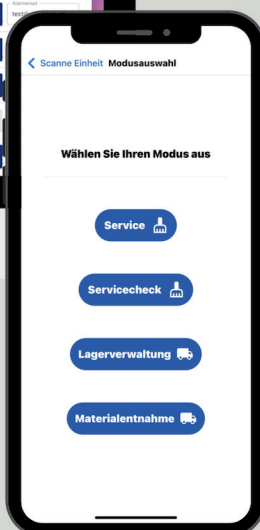

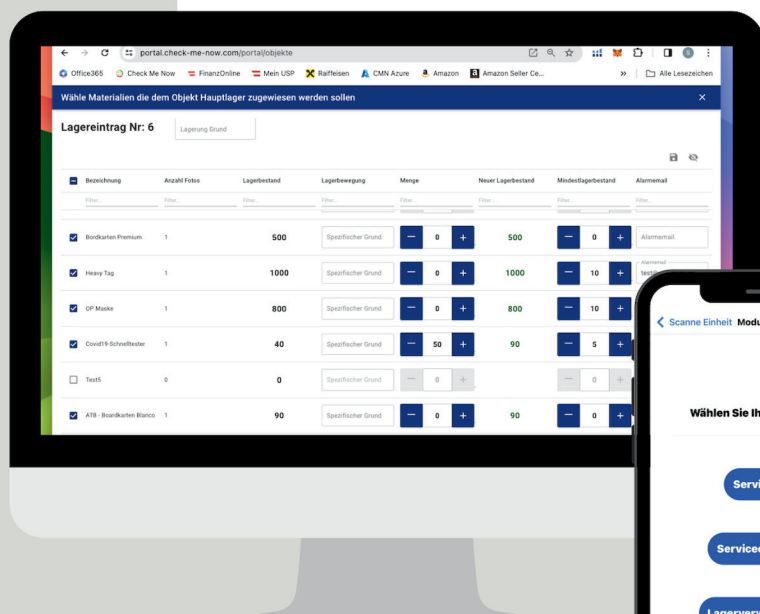

This approach saves workflow steps and time resources!

## Key Features:

- Real-time Monitoring
- User-Friendly Interface
- Inventory Management
- Automatic Orders
- Customizable Reports
- Scalability

## Functionality:

- Generate and stock your main warehouse through the portal.
- Create secondary storage as CMN-Touch devices or checkpoints, easily replenishing them as the facility manager on your mobile device.
- Allow your service personnel to deplete consumables during their services.

## Functions and Benefits Overview:

Our materials management tool is unlimited in terms of users, licensed based on the number of checkpoints or devices. It can be acquired as an additional license to an existing CMN product or as a bundled license (Checkpoint plus Materials Management) for singular applications.
